

TIME to Virtualize. Here's how.

JUMPSTART POC

VMware™ Basic JUMPSTART

CONNECTING YOUR BUSINESS TO THE BENEFITS OF VIRTUALIZATION THROUGH PROOF-OF-CONCEPT DEPLOYMENT OF VMware vSphere™

IVT-RTS VIRTUALIZATION PRACTICE

Consultancy & Advisory Services
Deployment & Project Management
Education & Training Services
Managed Services

With over 500 training and project engagements in server, storage and network infrastructure, IVT brings an in-depth knowledge of the hardware layer to Virtualization considerations

We approach Virtualization not only as a layer to be implemented, but as a solution to be designed and optimized on top of the actual hardware – i.e. the server, storage and network infrastructure.

With our strategic alliance with RTS AB of Sweden, the first VAC (VMware Consulting Partner) in Europe, we represent well-over 500 consultancy, training and project engagements in the area of virtualization in Europe and Asia in our Virtualization Practice. Our practice covers VMware, Microsoft, Xen and Avance.

This document refers to products and trademarks by VMware and VMware service documents where applicable.

JumpStart services provide your organization with a quick way of implementing a limited set of 2x VMware ESX™ Servers and a vCenter™ Server in your environment.

BENEFITS:

- Leverage VMware-certified consultants for efficient deployment and knowledge transfer
- Pre-Study Assessment provides the company with a picture of how virtualization can be potentially implemented in its environment
- Get a VMware Infrastructure quickly set up to allow organizational review of its features and benefits
- Proof-of-Concept (POC) set-up allows for a risk-free evaluation & testing of your applications and corporate services on a Virtual Infrastructure

DELIVERABLES:

- A Pre-Study Assessment Report on your current environment
- A Virtual Infrastructure consisting of 2x VMware ESX Servers and 1x vCenter Server
- Creation of example virtual machines for discussion and testing
- Discussion of potential implementation scenarios and best practices

CUSTOMER REQUIREMENTS:

- VMware ESX and vCenter supported hardware and operating system environment
- Minimum of 60GB local free space, supported NAS, iSCSI or SAN Storage
- Actual licenses for production are not included in this package

TARGET AUDIENCE:

Organizations who would like to explore the features and benefits of virtualization with a rapid deployment of VMware vSphere as a POC or as an initial test-bed for identified applications.
